**TWO WEEK LANE CLOSURE ON NH 114 BRIDGE IN GRANTHAM**  
**ONE LANE TRAFFIC CONTROLLED BY TEMPORARY TRAFFIC SIGNAL**

The New Hampshire Department of Transportation announces the rehabilitation of the NH Route 114 bridge over Stocker Brook in Grantham will require single lane traffic for a two week period, beginning Monday, May 10, 2004.

During this period, traffic will be controlled by temporary traffic signals 24 hours a day. This will allow for the removal of temporary pavement and repaving at the bridge location.

Neil Daniels, Inc. of Ascutney, Vermont is the general contractor for the \$820,000 project, which has a final completion date of June 1, 2004.
